To Ward School Education in Danger.—At a meeting of the School Officers of the Fourteenth Ward, idelst Ward School No. 17, Feb. 27, 1851, the following groundle and resolutions were unanimously adopted.

Hisror, The Board of Education, at their Session held fee E. 1851, have adopted a project of a law which, if ancioned by the Legistature, will completely descroy the Ward School System of Education as at present con fucted by the several Wards, and which is becoming so deservedly pepular with all classes of the community. Therefore, Essied, That the contemplated change in the school law by wantering the force, or any part of it as at present exceed by the Transces of the several Wards to the Board of Education must prove highly prejudical to the cause of Education by restraining the power, and consequently dishibiling the interests and vigitance of its most efficient feets.

Essied, That no just cause can be shown why the Soard Education should in any way interfere with the appointing of the cachers and the regulation of their sularing to the

of teachers and the regulation of their sularies in the sels of the several Wards, or deprive the Trustees from setting such books as will in their judgment prove advan-

should of the several Wards, or depiction and the setting such books as will in their judgment prove advantering such books as will in their judgment prove advantering to the achools.

Resized, That the restriction, if not prohibition, in reference to reparting School Buildings, requiring a permit and as apprepriation for the same from the Board of Education to the same from the Board of Education as the school and prove injurious to the building by delay, as accients frequently occur and damages by the elements.

Beeing immediate action. And it is not to be presumed that the Trustees are so far inferior to to the Board of Education as not to be able judiciously to perform such simple duties, having daily intercentse with the schools.

Resided, That we consider the interaction of the Board of Education a direct insult to the E ectors of the several Wards, by depriving the officers elected by them from performing the duties in their schools, while the Public School Society can conduct their business in the locaest manner and call for what money they this proper, with none to bring them to account.

CHILDREN'S FEET—A WORD TO PARENTS.—Many children, as parents are no doubt aware are deformed from relaxation of the planet muscles—from which the foot, particularly the instep derives its strength and perfect form—during the early years of walking, leading to malformation of the feet, lameness and misery through life. The difficulty admits of easy and prompt remedy, and as the celebrated Surgeon, Amesbury of London, savs:

misery introduces me. The annually samins of easy shap prompt remedy, and as the celebrated Surgeon, Amesbury of London, says:

"Many of the cases of knock kees, and those cases similating hip decrease can be removed easily and cartainly, by properly sustaining the phaset sech."

The subscriber, during the long period he has been engaged in the manufacture of Boots and Shoes, has had his attention repeatedly drawn to this subject by the complaints of children suffering is the instep, ankle and log from the relaxation of the above named masches of the foot. These complaints led him to devise—long before hearing an opinion from any source—some plan to make the boot or shoe support the instep of the foot, both of grown persons and children. His well known "STEEL ST kING SHANK" for men's boots and sloes was the first result of this devising, and has added to the pleasure and comfort of many thousands. He has since perfected a "Spring Shank" for children's shoes, which holds the instep firm, strengthers the whole foot, adds nothing to the bulk of the shoe, and but slightly to its price.
